

MUTHUREC 124/P

Melfort, Saskatchewan, Canada

The object of this leaflet is to convey by means of a few views, an impression of Melfort, Saskatchewan, and the surrounding district to those interested in the possibilities and opportunities of a new Country. This on the principle that seeing is believing!

With regard to the Town itself, it will suffice to say that with four Churches, three Hotels, two Banks, a Grist Mill, a Creamery, a Public School, a Telephone System, Stock Yards, Lumber Yards, Elevators, Hospital, and a full complement of Stores, it is well equipped to provide for all possible requirements of a farming centre.

The Melfort district is particularly suitable for mixed farming. The soil is a heavy rich loam, in which wheat, oats, barley and flax

yield abundant crops. Average per acre: wheat, 27 bushels; oats, 55 bushels; barley, 30 bushels—with yields running to high figures in good years: wheat, 55; oats, 110; barley, 55. Roots may also be grown with great success. Cattle buyers make periodical visits and give good prices for stock.

Land may be bought near Town at fair values, or homesteaded in the outlying districts.

Melfort is the nearest agricultural district to the Hudson Bay, and the centre of the famous Carrot River Valley. The Canadian Northern Railway route is now constructed and in operation to the Pas.

For further particulars apply to The Secretary of the Board of Trade, Melfort, Saskatchewan, who will make prompt and courteous reply to all inquiries.
